

Wildlife and Forestry Services & Pugdundee Safaris Present

Professional Naturalist Training Course

(PRONAT V – 17th August to 07th September, 2022)

(Extension – 07th to 10th September, 2022)

Course Overview

Wildlife and Forestry Services in association with Pugdundee Safaris presents Professional Naturalist Training Course (PRONAT) for candidates who deeply desire to learn about nature and wildlife, or launch their professional careers as naturalists.

Every year when we receive applications for the position of a naturalist, it comes from two kinds of candidates – the ones who dream of becoming a naturalist and the others who are willing to give up their corporate jobs to explore the wilderness and follow the career path of a lodge naturalist. Therefore, PRONAT has been curated with belief that no prospect should be turned down for the lack (or presence) of a certain education background or domain experience.

As experienced lodge operators and wildlife professionals, we realize that the forest is a vast observatory for passionate nature lovers, but to succeed professionally as a naturalist, there are further requirements. To pursue career as a Naturalist, the following are a must –

- Appreciation towards all forms of nature.
- Knowledge of habitats and ecosystems.
- Ability to not just comprehend, but also interpret complexities of the forests in the simple terms.

PRONAT, is India's first-of-its-kind Professional Naturalist Training Program is conducted at Satpura's, Denwa Backwater Escape, by Pugdundee Safaris in association with Wildlife Forestry Services (WFS).

This twenty-one night's program conducted by experts in the field of wildlife and conservation, focuses to elevate passionate wildlife enthusiasts into professional naturalist. There is an additional 3 nights extension available for guiding techniques. With the completion of this program the participants will be equipped to be inducted as trainee or lodge naturalists in wildlife-based tourism sector, start leading nature-based tours, or simply learn how to appreciate nature from a wider lens.

The program offers–

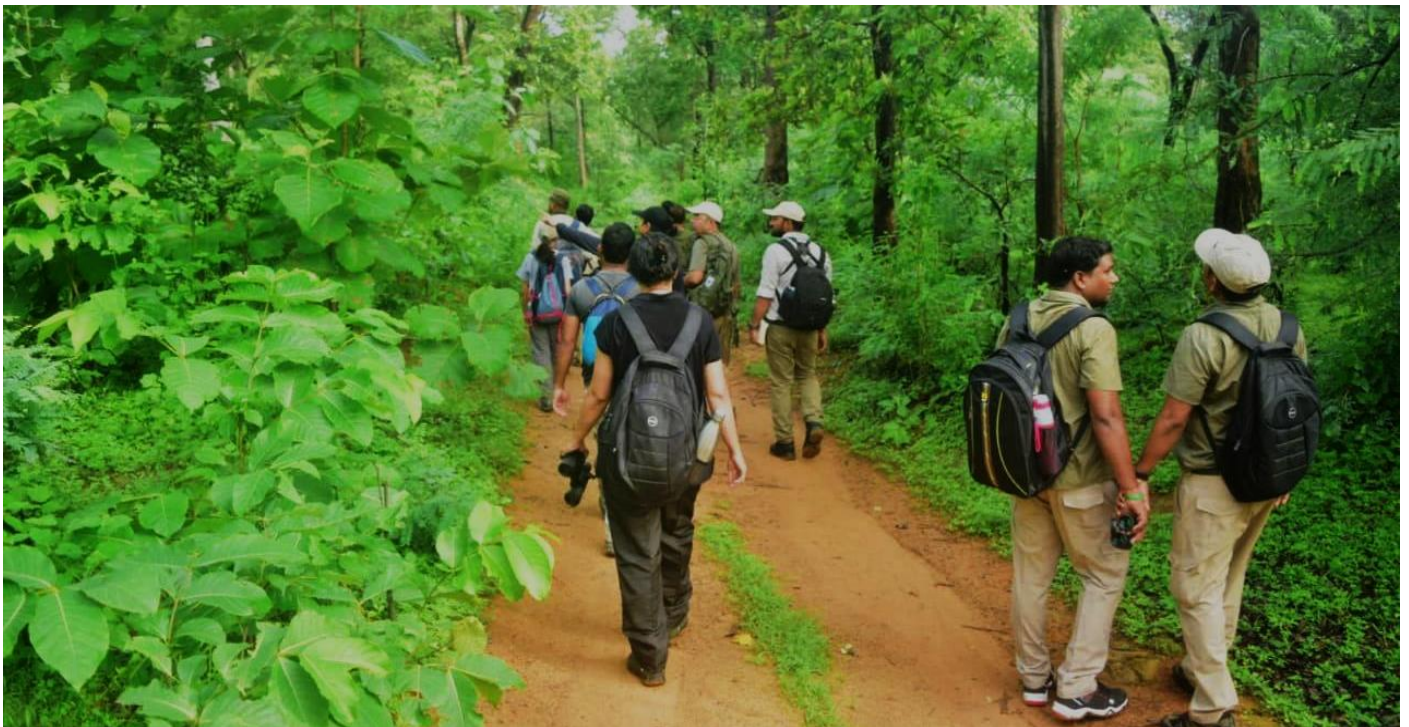

- Guided course delivery from subject experts
- Thorough classroom sessions and practical sessions in the wilderness.
- Excellent opportunity of peer learning through engagement
- First hand exposure into the actual life of a naturalist
- Certificate of accomplishment

Who Should Join

- Are you keen on expanding your scientific knowledge about forests, flora and fauna?
- Are you looking to boost your career as a professional guide or conservationist?
- Do you wish to change your routine and experience the distantly fascinating life in a wilderness setting?

Opening new doors

Professional Naturalist Training program is essential for those wanting to pursue a wildlife and conservation orientated career. It helps upgrade the life skills and discipline needed for nature reserve jobs, or a future as a professional field guide, or a wildlife tour leader. For those with experience in wildlife education and tourism, or with qualification in hospitality, or environmental sciences, PRONAT helps set the stage and shape the skills professionally required in the wildlife tourism industry.

The Wilderness Experience with PRONAT

Explorers and enthusiasts who wish to learn more about Indian wildlife, or kick-start their career as nature guides and lodge naturalists, are welcome to apply. The enriching experience of peer learning and professional guidance, while living in a remote boot camp is a life altering experience.

For those who are looking to ditch the routine city life for the wilderness, PRONAT will provide quintessential techniques for inculcating new hobbies like species identification, interpreting tracks and signs, or learning first-aid in the forests.

- Life in the camp will be an adventure for the ones who are passionate about nature and can minimally appreciate lack of internet, as much as the presence of it.
- The candidates should be willing to learn from the experts, and the experiences of their peers (forest life is about team work and upgrading life skills).
- Experts will deliver lectures in English. An understanding and speaking fluency in the English language is a must.
- Candidates joining PRONAT, who wish to take up guiding as a profession must obtain a valid LMV driving license prior to the commencement of the course. This is mandatory for candidates taking the extension for guiding techniques.
- Though one of the modules of the course covers reptiles, but participants are prohibited from handling any form of wildlife including snakes and amphibians.
- We do not cover snake handling, and therefore do not encourage the participants to handle any form of wildlife even after undertaking the course.
- Candidates joining with the purpose of exploring and expanding their knowledge on wildlife, must be willing and enthusiastic towards the course curriculum.
- At the end of a course, candidates will be required to take a practical and theoretical examination. The qualifying candidates will be rewarded with a completion certificate.

About us and trainers

“Wildlife & Forestry Services”, a professional wildlife management & forestry consultancy firm in association with “Pugdundee Safaris”, a leading sustainable wildlife tourism company organises this unique wildlife training course.

Wing Leader – Kartikeya Singh is the course coordinator and lead trainer.

Associate trainers are Nikhil Bhopale, Nariman Vazifdar and Vikram Ahlawat.

Kartikeya Singh – Kartikeya holds a Master’s Degree in Ecology & Environment and has eight years of research experience working with Wildlife Institute of India during which he studied the ecology of Indian Wolves and the Asiatic Lions. Kartikeya has also worked as an additional photographer on several documentaries produced by BBC and other eminent production

houses. A proficient trapper of wolves and other canids, he has expertise in catching, anaesthetising and radio collaring wild animals. In 2011, he was one of the specialists involved in the reintroducing Gaur from Kanha to Bandhavgarh. Kartikeya is also a specialist trainer who regularly conducts training for frontline forest department staff, guides and naturalists.

Nikhil Bhopale – Nikhil has worked on several research projects as an Ornithologist and Herpetologist. He has spear-headed effective conservation projects across India and has been a recipient of several awards for nature conservation. A biodiversity expert, an eco-tourism consultant, a hands-on mentor, an experienced trekker, a knowledgeable author, a

wildlife photographer and above all, a committed conservationist, Nikhil has been a faculty for BNHS educational courses and also co-authored ‘**Book of the Indian Subcontinent – A Field Guide**’ published by BNHS and Oxford University Press.

Gowri Shankar is a wildlife biologist studying king cobras for close to two decades. He is enrolled as a Ph.D. candidate at North Orissa University, Odisha, India and is a former exchange student at Uppsala University, Sweden. His interest lay in Evolutionary Biology and is studying the phylogeography of king cobras across southeast Asia. He has authored and co-authored 11 scientific papers on king cobras (6 were part of a special issue) for the 'Hamadryad', a leading herpetological journal. As a field biologist, he has been studying the natural history of king cobras for over a decade at Agumbe. As part of his study, he has rescued and relocated over 350 king cobras from distress situations and monitored over 35 king cobra nests. He was instrumental in initiating the pioneering radio telemetry study on king cobras and was able to discover the secret life of king cobras.

Vikram Ahlawat - is a Master Trainer with RLSS (Royal Life Saving Society) since 2009, which is one of our country's leading organizations for First Aid and Life Guard training. An avid swimmer and sportsman, Vikram has a varied experience in life saving trainings.

What will you learn

As a stepping-stone into the world of natural systems, diversity in subjects has been at the core of the course design. Candidates are provided introduction to the following subjects:

Birds

Butterflies

Amphibians

Field guiding as a profession

(Only in extension)

Help creating a guided nature experience

(Only in Extension)

Techniques of Guiding (Only in extension)

Reptiles

Trees

Mammals
